Hi Tom and Arthur,

After additional internal review and discussions with the State Water Resources Control Board, I now have closure concurrence from our supervising PE, assuming no change in conceptual understanding of the site or significant public comment, after: (1) public participation, and (2) proper destruction of site monitoring wells. [Please have public participation and well destructions completed by \*\*September 30, 2016\*\*.](#) When those tasks have been completed, the site will be closed by Sacramento County EMD.

Thanks!
