Dear Mr. Hoxsey:

CLOSURE DENIAL REVIEW FOR PETROLEUM UNDERGROUND STORAGE TANK CASE,  
OAKVILLE FACILITIES INGLENOOK, HIGHWAY 29 & OAKVILLE CROSS ROAD,  
OAKVILLE, NAPA COUNTY

State Water Resources Control Board (State Water Board) Resolution No. 2012-0062 requires that State Water Board staff review a lead agency's decision when the lead agency has denied a request by a responsible party for an underground storage tank (UST) case closure pursuant to the Low-Threat UST Case Closure Policy (Policy).

The subject case has the following identification numbers:

- State Water Board, GeoTracker No. T0605591139
- San Francisco Bay Regional Water Quality Control Board (San Francisco Bay Water Board), Case No. 28-0126

State Water Board staff reviewed the closure request dated March 2, 2016, and the response from the San Francisco Bay Water Board dated May 5, 2016. After careful consideration of the GeoTracker record, State Water Board staff agrees with the San Francisco Bay Water Board staff determination that all of the Policy criteria have not been met. Based on information in the above-referenced GeoTracker record, State Water Board staff finds that the subject case does not meet the following Policy criteria:

- **General Criterion g.** – Soil or groundwater has been tested for methyl tert-butyl ether (MTBE) and results reported in accordance with Health and Safety Code section 25296.15.

Soil and groundwater samples were collected at the Site between 1986 and 1989, but were not analyzed for MTBE.

Contaminants remaining at the subject site continue to pose a potential threat to human health, safety, and the environment. Criteria for low-threat UST case closure have not been met at this time, therefore closure of the UST case is not appropriate.

If you have any questions, please contact Mr. George Lockwood at (916) 341-5752 or [George.Lockwood@waterboards.ca.gov](mailto:George.Lockwood@waterboards.ca.gov).

Sincerely,

Karen Larsen, Deputy Director  
Division of Water Quality
